

The Company

About us

- ❑ CORALSys was established within the Coral Group in 1995 in order to specialise in the development of bespoke software applications. Typically, these are undertaken on a fixed price basis, with the company committing to delivery at an agreed budget, and within agreed time constraints. Where the client's requirements are better suited to working on a time and materials basis, then this approach is used.
- ❑ Projects range from the development of small (1 or 2 man months) databases, to large-scale projects covering major, and complex, applications, often requiring the integration of diverse software and data.
- ❑ CORALSys has undertaken numerous assignments for public and private sector organisations, generating significant repeat business from these undertakings. CORALSys's commitment to delivering quality results has played an important role in building confidence in our clients.
- ❑ CORALSys has built up significant expertise in the development of applications in the defence and engineering marketplaces, with a particular emphasis on real-time processing.
- ❑ In recent years CORALSys has developed considerable expertise in the design and development of database systems,
- ❑ To supplement our own resources in delivering solutions for our clients, CORALSys has built up an extensive database of contract staff who work, under our control, alongside us on client engagements. This resource is also accessible to our clients to help solve interim shortages, or to provide temporary expertise where required.

Quality

- ❑ CORALSys has had formal quality accreditations for over 15 years. It was initially assessed to the NATO Defence Standard, 05-21, and subsequently AQAP 1 and 13. Certification to BS 5750 followed, with the current accreditation being to ISO 9000...
- ❑ CORALSys has formal accreditation to ISO 9001:2000 and ISO 9000-3 (TickIT)
- ❑ Staff members have been awarded certificates in Business Excellence, and in implementing Total Quality Management, including the EFQM Excellence Model.
- ❑ All projects are managed in line with a quality plan agreed with the client, supported by relevant project management software, and subject to a formal Configuration Management System to ensure effective change management.
- ❑ The company has been trading successfully since 1995, winning continuation work and multiple assignments with clients, demonstrating client satisfaction with the quality of our work.
