

IT Consultancy

<p>Benefits</p>	<ul style="list-style-type: none"> ❑ The client has flexibility to expand or contract project resources as needed. ❑ Wide range of skills available, extending the scope of the client's IT capability. ❑ Cost effective access to skills which may be needed only occasionally – pay for them just when needed. ❑ Consulting staff work under the client's direction, facilitating communications and progress monitoring. ❑ Skills transferred from CORALSys Consultants though joint project participation. ❑ CORALSys Consultants can fill the gaps within the client's project team.
<p>Expertise</p>	<ul style="list-style-type: none"> ❑ Project Management: CORALSys can provide Project Managers, working to the client's preferred procedures and control system, with extensive experience in defence, engineering and technical applications in addition to the more traditional business systems. ❑ Systems Analysis: Assistance from requirements definition through to the production of outline systems specification is provided. Relevant development tools, specified by the client, or selected by CORALSys are used as required. ❑ Systems Design: Significant expertise is available, particularly in the design of real-time and data acquisition applications. CORALSys also has extensive capabilities in the areas of command and control systems, radar and EW, and military communications systems. In the commercial arena, our experience encompasses CRM systems, inventory management and sales order processing. ❑ Systems Implementation: Business benefits are ultimately delivered only when systems are successfully implemented, and perform to their design specifications. CORALSys has successfully tested and implemented systems for clients covering a wide range of application areas. ❑ Studies: Studies such as system impact, project evaluation and staff evaluation are examples of topics which can be undertaken. ❑ Training: Training on a variety of programming languages and operating systems can be provided both on and off site. Content and presentation, along with times and dates, can be tailored to the client's specific requirements.
